

Three-phase dry type ecological isolation transformers with high performance finished in anti-flash varnished for maximum protection, insulation, noise and vibration reduction.

### **Technical characteristics**

| Rating              | 25 kVA                   |
|---------------------|--------------------------|
| Input voltage       | 400 V                    |
| Output voltage      | 400 V                    |
| Frequency           | 50/60 Hz                 |
| Connection group    | Yyn0                     |
| Protection degree   | IP-00                    |
| Cooling             | AN                       |
| Ambient temperature | 45 <u>°</u> C            |
| Temperature rise    | Class F - 155 <u>°</u> C |
| Insulation          | Class H - 180ºC          |
| Windings            | Class HC - 200 ºC        |
| Inrush current      | < 8In                    |
| Voltage drop        | < 2 %                    |
| Efficiency (%)      | 97,8                     |
| Noise level (dB)    | < 45                     |
| Test voltage        | 3 kV (1 min, 50 Hz)      |
| Standards           | IEC/EN/UNE-EN 61558, CE  |
| Weight              | 166 kg                   |

# **Dimensions**

Dimensions (AxBxCxDxE): 480x270x480x164x400 mm 11

Three-phase dry type ecological isolation transformers with high performance finished in anti-flash varnished for maximum protection, insulation, noise and vibration reduction.

### **Features**

Dry type transformer

All transformers are dipped in anti-flash varnish for increased insulation and compactness.

Reduces long-term operating costs.

Low temperature rise.

Longer life than standard transformers.

Prepared for higher ambient temperatures.

Low connection peak.

Lower noise level.

Safety class I

Includes lifting eyebolts

Possibility of tailor-made manufacturing

## **Applications**

- Circuit isolation, with the possibility of increasing or reducing the voltage.
- Reducing voltage drops in installations with long cable lengths. With the installation of a step-up transformer and a step-down transformer.
- In installations with a certain level of electrical noise, the TTG series helps to improve the electrical network quality in secondary.
- Changing the neutral system of an installation
- In installations where energy savings is critical, or where a lower connection peak is required such as renewable energy plants or high energy efficiency installations.

### Available accessories

- Protections in primary and secondary.
- One, two and up to 3 electrostatic screens.
- Class II
- Wheels.
- PT100, PTC or Bimetallic probes.
- Painting C5.
- Different RAL.
- Temperature control unit
- Anti condensation system
- Different IP up to IP-65

#### CE certificate

Ecotransformer
