

# 1. AC/DC Conmuted power supplies

FCP FAMILY > FCPB6

## Features

Compact and functional design.

Cost effective and easy to connect.

Protection against:

Overvoltage

Short circuit

Input voltage 100-240V

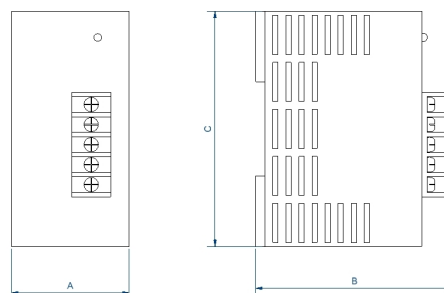

Stabilized output voltage, output voltage regulation -15% + 10%

## Technical Characteristics

|                     |                                      |
|---------------------|--------------------------------------|
| Rating              | 6 Adc                                |
| Input voltage       | 100 - 240 Vac                        |
| Output voltage      | 12 Vdc                               |
| Frequency           | 47 - 63 Hz                           |
| Protection degree   | IP-20                                |
| Ambient temperature | 50°C                                 |
| Mounting            | DIN Rail                             |
| Standards           | EN550011, EN55022, EN61000, EN 60950 |
| Weight              | 0,52 kg                              |
| Dimensions          | 56x121x110 mm                        |

## Applications

FCP power supplies are designed for all those applications that need a DC power supply at low voltage.
