Reactor

IP-20 enclosure in last generation V-0 fireproof metallic polymer box according to UL94

?Safety class I, convertible in class II

Includes thermal protection against overtemperatures

Possibility of tailor-made manufacturing

Technical remarks about the use of line reactors:

Reduction of the current harmonics generated by the equipment, reducing current consumption and improving power factor

Reduction of the peak factor of the current wave, increasing equipment's lifespan

Attenuation of the microcuts of the feeding voltage produced by the converter, source of the bad functioning of computers, robots and other equipments
